Summary

Final year Electronics and Communication Engineering student with hands on experience building and deploying web applications and Android apps, and leading a 3-developer team through 20+ product updates. Shipped live, real world projects used by students and clients, and continue to build production level applications that solve real problems. Actively seeking opportunities to apply my knowledge and project experience in real world software development roles.

Technical Skills

Languages: Java, HTML5, CSS3
Frameworks & Concepts: LoRA, LLM Fine tuning, Payment Gateway Integration, WebSockets, REST APIs
Databases & Tools: MongoDB, Firebase, Git, GitHub, Postman, VS Code, Claude

Work Experience

Full Stack Contribution **2026 – Present**

- Built live production websites as real-time project experience: **framecape.com**, **clubs.mkce.ac.in**, and **jmminkalam.in**, all developed by me end to end.
- Developed responsive web interfaces using HTML5, CSS3, JavaScript, and for framecape.com and created a custom API for the website to serve internship and blog pages, tested via Postman.
- Implemented Postman compatible CRUD operations to update student's internship certificates and blog postings.

Frontend Development **2025 – 2026**

- Built responsive interfaces using HTML5, CSS3, JavaScript, and Bootstrap for 3 clients, ensuring cross browser compatibility and consistent UI across all pages.
- Translated design mockups into reusable UI components and wrote clean, maintainable code, improving module level readability and frontend consistency.

Cybersecurity Intern **2025**

- Completed a 4-week AICTE and IBM SkillsBuild cybersecurity internship covering encryption fundamentals, secure coding practices, and vulnerability assessment techniques.
- Developed a Python encryption tool using LSB steganography, with structured logic and unit level testing, achieving 100% lossless data concealment across PNG and BMP formats.

Projects

VasoolX App **2026**

- Replaced manual spreadsheet and register handling of money lenders and borrowers, which caused conflicts in interest and bulk calculations.
- Built an Android app that automatically calculates interest and bulk dues for every borrower, keeps lender borrower records in one place, and eliminates calculation disputes.

RPM Chat Agent Dashboard **2026**

- Built a Remote Patient Monitoring dashboard with a REST web service backend; fine tuned TinyLlama 1.1B via LoRA, reducing loss from 10.9 to 0.25, and optimized 4 prompt classes with a 0.32 accuracy improvement.
- Applied structured data models and algorithm design for patient classification, and integrated the Ollama REST API with a 7B LLM for real time inference across WebSocket connections.

MKCE Clubs Portal **2025**

- Developed the official clubs portal for M. Kumarasamy College of Engineering and deployed a responsive UI actively used by 4000+ students across campus.

Education

M. Kumarasamy College of Engineering **2023 – 2027**
B.E. Electronics and Communication Engineering – CGPA: 7.35 (till 6th semester)

Kongu Matric Higher Secondary School **2022 – 2023**
HSC – 84.8%

Certifications & Achievements

- **1st Place** – Python Debugging & Quiz, National Level Techno Cultural Fest
- **1st Place** – Paper Presentation: "Efficient AI Usage", National Level Technical Symposium
- **Patent Filed** – Autonomous Mine Rover with live telemetry controlled using mobile; Nominated for Dr. Kalam Young Achiever Award 2025 (World Youth Federation)
